

Help us Co-create and be a part of

A common platform for remote monitoring
of Solar Pumps & Ground Water

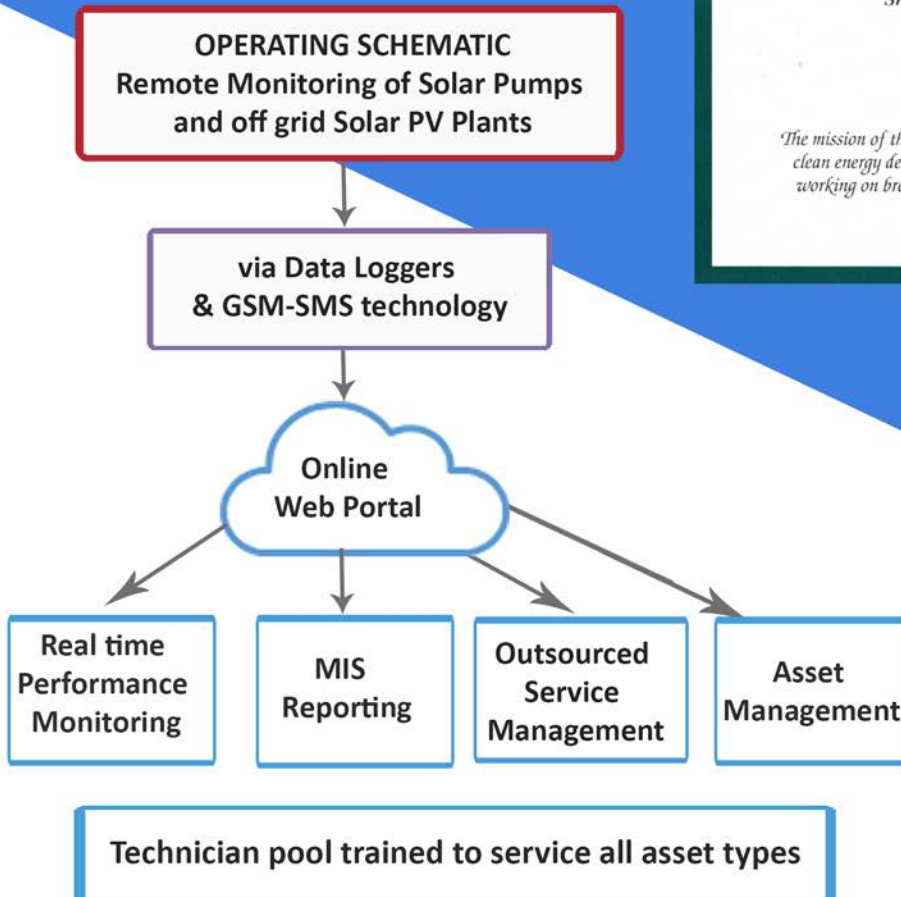

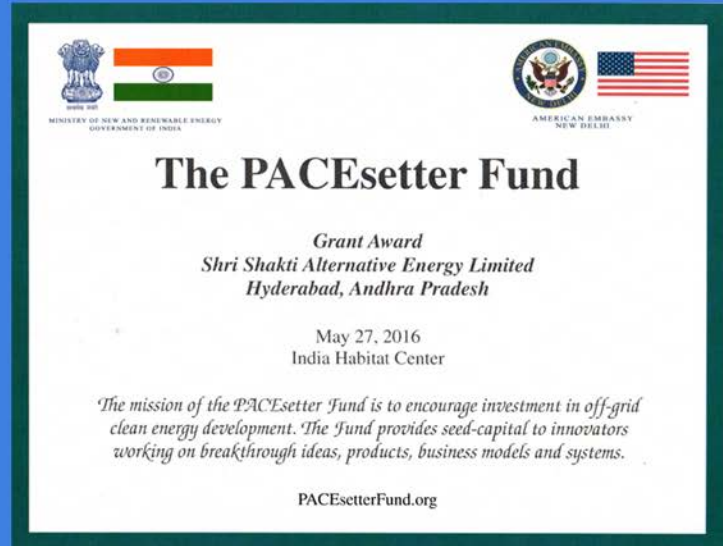

Solar Pro 

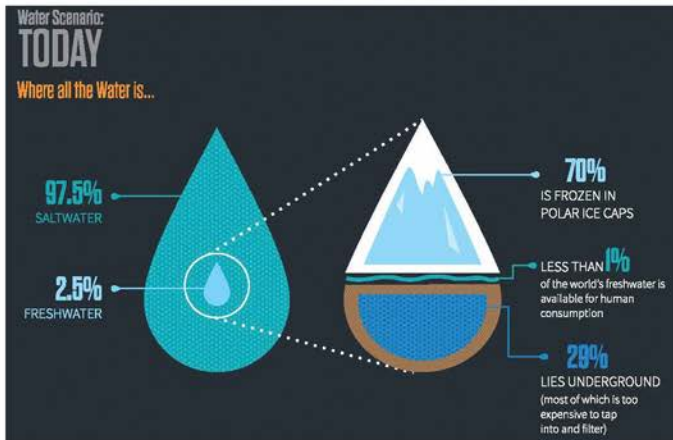

US Ambassador to India and Secretary, MNRE, presenting the grant award to SSAEL Team.

PACEsetter Fund, a joint initiative of MNRE, Govt of India and US State Department

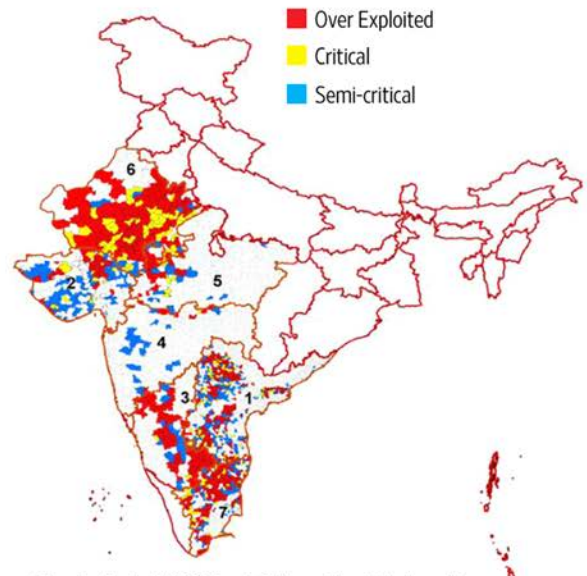

Key Features of the Project

- Online Web Platform to monitor both AC and DC solar pumps and off-grid solar PV power plants
- Real time data and performance reports for stakeholders viz, State and Central Govts, OEMs, Installers, NABARD etc
- Prototypes tested in Rajasthan. Roll out of pilot projects in Rajasthan and Chattisgarh in Q4 2016
- Potential to monitor cultivation, yields and ground water levels
- Linkage planned to GIS, Aadhar and Soil Health Card

GROUND WATER STRESSED BLOCKS OF INDIA

Source: IWMI

Participate and.....

- Outsource your warranty service to our common pool of technicians
- Benefit from our data analytics, GIS and MIS reports
- Save on Cloud Hosting and SMS data package rates
- Help in ground water management
- Holistic approach to agriculture – More Crop per Drop

Inviting OEMs and system installers to...

Participate in our pilot projects in
Rajasthan and Chattisgarh and avail

- FREE Retrofitted remote monitoring devices
- FREE Service for Solar Pumps for one year

Anyone can use our Software Platform
with no upfront investment –
Software as a Service (SaaS)
